U. S. Department of Agriculture	October 12, 1959
Agricultural Marketing Service	FP - 32
MEATTotal production	red meat this year may run second only to 1956.
A further increas	se will occur next year.
BeefCattle numbers or	farms next January 1 will probably reach a
record 102 to 103	B million head. This fall marketings of grass
	vill be about the same as last fall, and market-
ings of fed cattl	e, which provide most of the high quality beef,
are expected to i	
PorkMarketings from h	big spring pig crop will continue heavy this fall
	year hog slaughter is expected to remain high
and might exceed	this year's total.
	sheep and lamb slaughter ran about 8% greater
	l lamb has been plentiful throughout most areas
of country.	·
POULTRY	
	ole supplies this fall may be below year earlier,
	uate for the seasonally reduced demand.
	easing seasonally from this year's record-break-
	rd crop, which is 5% greater than last year's
	nore than previous 1957 record.
	of this year production may continue to run a .958. But in early 1960 output will probably fall
below this year's	
	e at seasonally low levels and milk production is
running slightly	
FRUITS	below year ago.
	Total U. S. <u>Early</u> and <u>Mid-season</u> oranges: 68
	isand boxes more than 3% larger than previous
	rida orange forecast: 93 million boxes, compared
	arvested last season. Total U. S. grapefruit
	ling California other areas) estimated 41-1/2
	about same as previous year. Florida tangerines
	llion boxes11% below last season. Florida
	and boxes, a full 50% greater than last season's
short crop.	
DeciduousTotal production	expected run about 3% larger than year ago and
	Apple crop now estimated around 115 million,
843 thousand bush	nels% below last season but 7% above average.
<u>Pears</u> , slightly n	nore than 31 million bushels8% above year ear-
	than average. Grapes: Emperor crop indicated
	in quality and quantity. Cranberries, a record
1 million, 273 th	ousand barrelsalso % above last year.

Processed..... In California, large increase indicated in canned apricot pack over year ago, considerable increase in brined cherries, but substantial decline in canned sweet cherries. Dried prune crop, 150 thousand tons--about 1-1/2 times last year's light tonnage, but 7% under average. Raising suffered some damage from early rains, but pack still expected be larger than in last few years. .Tree nut production expected total slightly more than year ago. Latest estimates: Almonds, 70 thousand tons--largest of record and 3-1/2 times size of last year's small output. Walnuts, about 62 thousand tons -- almost a third below record 1958 crop and 16% less than average. Filberts, 9 thousand, 420 tons--more than a fourth above last year's crop and nearly a fifth above average. Pecans, 129 million, 700 thousand pounds--more than a fourth smaller than 1958 crop and 14% below average. VEGETABLES Fresh......Production fall vegetables expected total about 12% less than year ago. Indications point to considerably smaller supplies cabbage, carrots, lettuce, slightly smaller supplies tomatoes, cauliflower, snap beans and sweet corn. But larger production cucumbers, green peas and eggplant expected. Processed.....As current season began, carryover of canned vegetables was larger than year earlier. Production of vegetables for processing is expected to be below 1958. About a fourth more sweet corn expected, 6% more snap beans and 2% more green lima beans. Also considerably more spinach for processing, compared with last year's small output. But less tomatoes, cabbage, beets, green peas are likely. Potatoes.....Supplies this fall and winter will be considerably below last year's heavy offerings. Latest estimates place fall crop slightly above 167 million hundredweight -- 9% below last year but about a tenth above average. Sweet potatoes. Crop now estimated at slightly more than 18 million hundredweight --3% above last year buy 8% below average. RICE......Crop now estimated at 52 million, 600 thousand 100-pound bags-up 12% from last year and 10% above average. LARD......Production in months ahead expected continue large, due to increased marketings from big spring pig crop. Current stocks are

The Plentiful Foods Program

sharply higher than this time last year.
